

# Here is what YOU need to know about the Coronavirus

## Prevent the Spread:

- stay home if you feel sick
- cover your sneezes and coughs with your sleeve (not hands)
- wash your hands often

## Facemasks:

- if you are feeling well you do not need to wear a facemask
- facemasks should be used by those who are sick or healthcare providers

If you feel flu-like symptoms and/or recently traveled to an area affected by coronavirus, stay home and contact your primary care physician.
